2010 BAA Volleyball Player Evaluation

Thank you for coaching this year. Please evaluate your players and return the completed form to Karen Aber kaber1@comcast.net, during the playoffs, either in person, or email it. The form also can be found on the website under volleyball rules and forms.

No one but Karen and the directors will see these! These evaluations will be used is to help us balance teams for next season, so you don't need to complete evaluations for your seniors. Use the criteria below, and feel free to add comments about special strengths or weaknesses of the players.

Criteria for ratings:

1. **Dominant:** These players dominate the game when they are on the floor. They probably score multiple points per game, and play from end to end. They represent no more than about 10-15% of the players and play fairly aggressively.

2. **Above average:** These players have a good feel for the game and play all positions well. They are almost always where they should be, the play the ball well, and scored several points during the season.

3. **Average:** These players are generally in position, but they might not be aggressive in pursuit of the ball, or have a great "feel."

4. **Developing:** These players are still getting a feel for the game. They might be passive or are often not moving quickly for the ball.

Level: _____ **Team:** _____
