

Spider Pocket \$25.00

Shooting Strings

- Sloped shooting strings
- Tight top shooting string which prevents the release from hitting the plastic
- Bottom shooting string is soft lace to create a smooth ball release
- Channeled “web” shooting strings help support ball over horizontal shooting strings

Side Wall Strings

- Interlocking style in each diamond which prevents pocket from shifting
- Diamonds are fixed to sidewall at the position for an optimum pocket
- Side wall string runs the length of the lacrosse head and stretches the mesh at the top of the pocket

Top Scoop String

- Double interlocking stringing secures mesh to scoop and provides extra durability
- Diamonds are fixed to scoop at the position for an optimum pocket

Bottom String

- Weaved through each diamond and fixed to base of lacrosse head forming a half circle which allows the ball to settle to the ball stop

10 Diamond Hard Mesh

- Diamonds connect better to walls of lacrosse head
- Creates an instant pocket
- Better ball control created by texture of the mesh
- Forms pocket in the center of the head consistently
- Resistant to weather changes
