

### **WWPSA and GPS Press Release**

West Windsor Plainsboro Soccer Association and Global Premier Soccer New Jersey are delighted to announce a strategic training partnership for the 2018/19 season. GPS will provide professional support to all facets of WWPSA programming to maximize player development at all age groups.

The affiliation will allow players of all ages and abilities within WWPSA access to the GPS Player Development Pathway and Methodology. “GPS is excited to partner with a such a successful soccer organization. WWPSA shares our philosophy of player development and we’re looking forward to GPS providing additional support to all areas of the club” said Martin Punt the Director of Coaching for GPS New Jersey.

In addition to WWPSA Travel Teams that have been part of the New Jersey soccer landscape, GPS Mercer Premier Teams will also be formed. These Premier Teams will follow the GPS Premier Program format that has enabled the club to win state, regional and national titles in the last few years. “We are looking forward to the expertise that GPS-NJ can provide by offering professional training not only to our Travel and Premier Players, but also to our Recreational Players starting at the youngest levels. The partnership between GPS and FC Bayern Munich also offers players additional opportunities that no other club in the area can provide” said WWPSA President James Moore.

Launched in 2014, the official partnership between FC Bayern Munich and GPS is the most extensive partnership of its kind. Access to FC Bayern curricula, twice annual coach visits, uniform apparel, player development methodology, and the creation of FC Bayern GPS National Teams are just some of the benefits provided.
