

March 7, 2010

As we enter March, it is time to get into full swing preparing for the Summer Season. Practices at the Chaska Community Center are only a week away, and the past few days of warm weather are a reminder fields will be opening up before we know it.

The most important people in the soccer lives of each child in the club are without a doubt the team coaches. The level of success each team will have, the amount of enjoyment each player will have, and how much they develop throughout the season rests in the hands of the team coaches. It is imperative that each of us, as coaches, makes every effort to make the upcoming season as rewarding as possible for each child.

Listed below are the upcoming coaching clinic sessions. It is very important you make every effort to attend each session for your age group. Of course you are more than welcome to attend other sessions not listed for your age group. This is a great opportunity to learn new concepts, develop our coaching skills, and share ideas as coaches.
