If we are dominating– what are we doing to get more out of the game? <ul style="list-style-type: none"> <li>• Touch restriction</li> <li>• Zone touch restriction</li> </ul>	
What technique are we most having difficulty with?	

*If we are winning the game easily, to maintain respect to our opponents and challenges to our players we **do not** look to score in a specific way i.e. with a header after so many passes. We restrict our players, making scoring more challenging and beneficial to our technical development. This also sets practice goals. If we are losing heavily we look to get other things out of the game such as Scoring chances, better defensive performance individual and team*
