

Here's a guide to help determine what kind of helmet you may have.

90% of the helmets the boys are using are likely to be one of the Cascade models.

Look below to see if one of the helmets listed is the one you've got, and try to find a size on the helmet somewhere. Cascade helmet model names are typically somewhere on the visor. **Size is not important for Cascade models.**

There are several different helmet brands & models out there. ***The list below is NOT comprehensive, just a list of the more common helmets. Don't panic if yours isn't on this list!***

**If you don't see your helmet listed below or you're unsure, take a picture of your helmet, email it to Jeff Parker ([jefe42@comcast.net](mailto:jefe42@comcast.net)), and he'll get it sorted out.**
