

# Simple Dodge Drill with Feed and Shot

Purpose: The goal of this drill is to build off of the “Simple Dodge Drill” and teach players to look for the pass after clearing the defender.

A coach should set up in the defender position with players in lines of no more than six (6) and one player in the shooter spot. After the dodge is completed, the attacker (A1) should pass to the shooter (A2) who should shoot immediately. A1 then goes into the A2 spot and A2 joins the A1 line.
