

This is an informational guide on contact information settings for all Managers and Assistant Coaches for the website.

The site has a team contacts feature that is enabled to allow the public to see information about the coaches on the "Team Contacts" page and on the Team Home page (welcome page) without logging in. Your account settings determine what is available to the public.

Your account contact options are:

Public – Anyone can see

Roster – Must be logged into a team page to see

Private – No one can see

These options apply to:

Home Address

Home Phone

Work Phone

Cell Phone

Email Address

Only settings of "Public" will allow contact information to view by anyone who visits the site.

When you make your email address public it does not display your address. Just a link to email you with the website email system and even then your email address is not visible.

GvLL suggests that coaching staff make the email "Public" (again, will not be visible) and a phone number public to other coaches to contact you. This also allows your team members to contact you without having to log into the system.

Best regards,

Tim Laurent
