For the Winter Season, our goal is to provide all players with the most skill development possible. Our professional staff coaches will work with the players to hone their skills and develop them into fantastic young hockey players. Our skills practices for these players are held on Wednesdays and Saturdays. We encourage players to come to all days if possible, as we understand that some people have conflicting schedules - these practices are not mandatory. You can view the full practice schedule online.

One goal we try to obtain every season is to make teams as balanced and even as possible. Team requests will be acknowledged but not always obliged. Players will not be kept on the same teams. In the big picture, our program strives to make sure all players are developing and having fun! We strongly encourage parents to be their child's biggest fan, and to promote positive encouragement.

Please see the Week 1 & 2 schedule below: These practices are evaluation practices. They are for the coaches to evaluate the players, and to observe various skills in order to create fair and balanced teams. During these practices the coaches will have the players run through different power-skating exercises and puck handling drills. There are not games until December 2nd.
