

Your Life. Your League. Mobilized.™

League-Hub is an easy to use mobile app that enables leagues to capture scores, team sportsmanship ratings and ref ratings in real time.

Problem Statement:

1. Youth sports in general, and parents and coaches in particular, are becoming hyper-competitive often with too much focus on winning, and not enough emphasis on sportsmanship, teaching life lessons and “playing the right way”
2. League administrators, referees and volunteer coaches are stretched thin and often do not have easy mechanisms for capturing and transmitting game results and other relevant data to league HQ for benefit of all to see/use.
3. In all leagues/sports, at all levels, there are games where players, parents, coaches and referees demonstrate exemplary behavior and there are games with unacceptable behavior, and everything in between. League administrators generally only hear about the “blow ups” and have very little data on all other games, and this data void makes it challenging to properly and proactively identify & address negative behavior and difficult to recognize & reward positive behavior.

Solution:

1. League-Hub is an easy to use mobile app that enables leagues to capture scores, team sportsmanship ratings and ref ratings in real time.
2. After each game, via the mobile app, referees enter game scores and sportsmanship ratings (and comments) for each team; and each coach enters a rating for the referees (and comments)
3. The league no longer has to chase down scores of games and standings are reflected in real-time (sportsmanship ratings & averages are also visible if desired).
4. Sportsmanship and referee data is available in real time, and meaningful data is developed over time so negative behavior may be identified & addressed and positive behavior may be recognized & rewarded.

- Download the app “LH Admin” from Google Play or iTunes App Store
- Open the app on your Android or iPhone
- Choose your league

Recap:

1. League-Hub is an easy to use mobile app that enables leagues to capture scores, team sportsmanship ratings and ref ratings in real time.
2. The league no longer has to chase down scores of games and standings are reflected in real-time (sportsmanship ratings & averages are also visible if desired).
3. Sportsmanship and referee data is available in real time, and data is developed over time so negative behavior may be identified & addressed and positive behavior may be recognized & rewarded.
4. Coaches, referees and league officials now have meaningful data across season(s) to reward the best behavior (i.e. sportsmanship awards) and proactively address any issues
