

NORTHPORT/HUNTINGTON ICE HOCKEY CLUB
DEVELOPMENTAL PROGRAM

<http://www.nhhockeyclub.org/>

Each year our club, NHIHC, is prepared to offer an opportunity to those players who may not be ready to play at the High School level. Whether the player needs to enhance his or her skills or the player is not of age we will work towards providing practice ice and recreation league participation. We will work on all aspects of the game of ice hockey for the individual, including team concepts. It is our goal to prepare our club members to compete in the Suffolk County High School Hockey League at the Varsity level.

Participation in our Developmental program will be given to those members who attended our tryouts and are age eligible first, and then offered to underage members as roster space allows. We will attempt to participate in a recreational league that is best fitted for the dynamics of the group each season. We will participate in more than one recreational league whenever possible.

All members of our High School teams are welcome and encouraged to play in the recreational league with our Developmental team(s). The inclusion of HS players will provide support for our Developmental players, allowing our Developmental players to play at the highest level. The additional ice time for our HS players will help our HS teams. The crossover of HS and Developmental players will provide a long term positive effect.

Our club will place teams, not individuals, in the recreational league whenever possible. Doing this will enhance teamwork within our club. In addition to teamwork we will be afforded the economical advantage of paying a team league fee as opposed to members paying individual league fees. Developmental players will be paying a discounted league fee plus practice ice fees as their tuition. HS players who participate will only be paying a discounted league fee.
