EMERGENCY PLAN

2011

- When an emergency arises, the Head Coach or Assistant Coach in charge at the time is responsible to assess the situation immediately. All remaining teammates are removed from the area.
- He/she is required to stabilize the player/cheerleader in distress, evaluate his/her condition and determine if emergency medical help is needed.
- At all times, he/she remains with the child while another coach or Board member gets help. At no time is the injured child to be left alone.
- The parent is then contacted to let them know of the situation of their child.
- Once the situation is under control, the President is then notified of the incident so that follow-up can be done with the injured child's parents and to ensure that the proper paperwork is completed in a timely fashion by the coaches.

Paul Collins
President
