

How to: print your team's roster after you've assigned players.

Step 1: Log in and go to the "Teams/Schedules" tab to bring up a generic team page. Under Season: choose [Spring 2013] (if it isn't already there); Division: [whatever division your team is in for the current season]; and Team: [your team name] as shown in the picture below. This will bring up your team's page and should show the manager contact and schedule on the right (not shown).

Step 3: Click on the Options drop down button and choose Print Roster. It will bring up a second screen (usually) and will look much like the way it does below (without all the graphics). You'll see the blank space below each player's name for signatures. The team manager should be at the top. If you're also a player, don't forget to sign it too! Also, don't forget to print the waiver and attach. Thanks!

Step 2: Click on the "Roster" tab. This should bring up a list of all the players you assigned to your roster in the first part of the process (as shown at right).
