

Concussion ImPACT Testing

Harvard Vanguard is pleased to offer

ImPACT (Immediate Post-concussion Assessment and Cognitive Testing), a computerized, concussion evaluation system used to successfully diagnose and manage concussions.

- Baseline testing available (done before a child begins a contact sport or other activity and is used as a point of comparison should your child suffer a head injury)
 - For children and teens ages 10 through 19
 - \$25 fee for administration of the test
-

For more information or to schedule an ImPACT baseline test for your child, contact one of our practices:
