

## ImPACT Concussion Baseline Testing

As we begin the 2017 football season, your child's safety is our top priority. The Hunterdon Huskies are pleased to provide our athletes with a premier concussion management program. A computerized, 30 minute neurocognitive ImPACT Concussion Baseline test is provided to all athletes (age 10 and over), free of charge, by St. Luke's Warren Concussion Center. In the event of a concussion (or suspected concussion), this test will be used by St. Luke's Concussion Center in conjunction with any needed follow-up examinations and testing as part of the widely used Zurich Return to Play Protocol.

A baseline test is required starting at age 10 and must be updated every other year.

This is to verify that an ImPACT Concussion Baseline Test has been administered to my son by the staff of St. Luke's Warren Concussion Center, as follows:

Date of Testing: \_\_\_\_\_

Location of Testing: \_\_\_\_\_

Was the test performed deemed valid? \_\_\_\_\_

Name of Athlete: \_\_\_\_\_ Date: \_\_\_\_\_

Athlete Signature: \_\_\_\_\_

Parent/Guardian: \_\_\_\_\_ Date: \_\_\_\_\_

Parent/Guardian Signature: \_\_\_\_\_
