  - a. Google is for a Gmail account. Follow the **Heads-Up!** Warning. Click the link **these steps** to manually add the URL below to your google/gmail calendar. I had problems using the automatic process and used the manual directions. After following the manual steps the schedule did appear in my Gmail account, however there may be a delay appearing in your calendar.
  - b. iCal is for iPhones / iPad/ iTouch. Just follow the prompts.
  - c. Outlook is used for the Microsoft Outlook application. The process is rather straight forward, just follow the prompts
