▶▶ Official Women's Lacrosse Statistics Rules

Approved Rulings and Interpretations

NCAA women's lacrosse has not had an official statisticians' manual in place until now. Based on an original set of guidelines developed by Chip Rogers, this manual has been created to provide consistent rulings of the statistical components of women's lacrosse.

APPROVED RULING—Approved rulings that appear in this text (shown as A.R.) are designed to interpret the appropriate rules and definitions and to apply them in the appropriate context. Statisticians should also make an effort to understand the NCAA playing rules of the game and to match that awareness with the rules for statisticians. In the approved rulings listed in each section, players A1, A2, etc., are on same team (Team A), while players B1, B2, etc., are on the opposing team (Team B).

STATISTICIAN'S JOB—The statistician's job is to record the statistics as they happen, accurately reflecting what happened and not what might have happened if something else had not intervened. What this manual is intended to provide is a set of guidelines to determine officially what actually happened. Should there be doubt in the mind of the statistician, he or she should utilize the guidelines and philosophies in this manual. If there is no doubt, then the statistician should follow her or her observation.

▶ SECTION 1—GAMES PLAYED

Article 1. A player should be charged with a game played if she is in the game while the clock is running.

- (1) A game should not be charged if a player is sent into a game during a dead-ball situation and is substituted for before play resumes.
- (2) A game should be charged if a player appears in a game only during a dead-ball situation, but incurs a penalty during that interval. If the player in this situation is the goalie, she is charged with a game played but no minutes played.
- (3) For the purposes of statistics, a game should not be charged to a player if a team's game is never played or if the game is declared a forfeit by the game official before the contest has progressed to a "reasonable point of conclusion" (48 minutes completed). See Appendix A for more information.
- (4) Charge a game played to a player if a team's game is unfinished, but is declared by the official to have progressed to a "reasonable point of conclusion" (48 minutes completed). See Appendix A for more information.

Article 2. The first attack unit, first offensive midfield unit, first defensive unit, and first goalie will be considered the starters.

▶ SECTION 2—GOALS

Article 1. A goal should be credited to the player who shot the ball, scoring a goal for her own team. In certain situations, a Team Goal (also known as Own Goal) may be credited. However, statisticians should err on the side of awarding the goal to the player who took the original shot.

- (1) A player's shot that enters the goal after a ricochet off a teammate's stick should be credited as a goal to the original shooter, unless the player the ball ricochets off of intentionally redirects it into the goal.
- (2) A ball entering the goal that appeared to have been a pass to another player shall be counted as a shot and a goal for the player who made the pass.
- (3) A Team Goal (also known as Own Goal) will be credited if a defensive player gains possession of the ball and then causes the ball to enter her own team's goal.
- (4) **A goal scored on an eight-meter (free-position) shot should be notated specifically as an eight-meter (free-position) goal.**

A.R. 1. A goalie who flings the ball up field against a full field ride, causing the ball to enter the other team's goal, shall be credited with a shot and a goal.

A.R. 2. Player A1 takes a shot that hits teammate A2's stick and deflects into the goal without any intent on the part of A2 to redirect the ball. Credit a goal to A1.

A.R. 3. Player A1 takes a shot that deflects off of teammate A2's stick, who clearly causes the ball to be redirected into the goal. Credit A2 with a shot and goal and A1 with an assist.

A.R. 4. Player A1 takes a shot that deflects off defensive player B1's body or stick and goes into the goal. Credit A1 with a goal.

A.R. 5. Player A1 takes a shot that the goalie originally stops but does not control and does not gain possession of, and then the goalie inadvertently causes the ball to go into the goal (e.g., kicks, hits with her stick). Credit A1 with a goal and no save for the goalie.

A.R. 6. Player A1 takes a shot. The goalie makes the save and has clear possession of the ball. However, the goalie then causes the ball to enter the goal. Credit A1 with a shot, the goalie with a save, and Team A with a team goal.

A.R. 7. Player A1 takes an eight-meter (free-position) shot and scores a goal. Credit A1 with an eight-meter (free-position) shot and an eight-meter (free-position) goal. Her eight-meter (free-position) shot also counts toward her total number of shots in the game.

- (5) If a team is credited by the game official with a forfeit win, 1-0, that team shall be credited with an own goal. See Appendix A for more information.
- (6) Any goal scored that is subsequently nullified for any reason shall not be credited to any player.
- (7) Any goal (or any other statistic) in a game played and subsequently forfeited shall be counted for the appropriate player.

▶ SECTION 3—ASSISTS

Philosophy. An assist is not necessarily credited to a player who makes a pass before a goal. There should be conscious effort on the part of the passer to find an open player for a shot or to help a player work free for a shot. There should be no particular time frame for an assist (although the pass and shot should appear to be part of the same play) nor should there be any rigid distance factor in the play (the player scoring the goal could take one step, several steps, or even run a number of yards with the ball and still have the passer credited with an assist). An assist should not be credited on a play when the goal scorer dodges a defensive player after receiving the pass before shooting unless, in the opinion of the statistician, it was the pass itself and not the dodge that led directly to the shot.

Article 1. A player is credited with an assist when she makes, in the opinion of the statistician, a pass contributing directly to a goal. An assist cannot be credited to any player other than the one who had the ball immediately before the player credited with the goal.

A.R. 1. Player A1 passes to teammate A2 and the pass finds A2 open for a goal. Credit an assist to A1.

A.R. 2. Player A1 passes to teammate A2 in a circle offense against a zone defense, a pass that appears to be a routine pass in a series around the zone. A2 shoots and scores; credit an assist to A1 because her pass led directly to the goal.

A.R. 3. (a.) Player A1 passes the ball to teammate A2 who has a one-on-one play with the goalie. A2 fakes the goalie several times, shoots and scores. Credit the assist to A1 because there is supposed to be a goalie in the goal circle and sometimes a fake will be necessary to score. (b.) A1 passes the ball to A2 who has a one-on-one with a defender and an untended cage. A2 fakes the defender, shoots and scores. Do not credit an assist on the play because A2 had to fake a defender who was not the goalie.

A.R. 4. Player A1 passes to teammate A2 cutting across the goal circle. A2 is closely guarded but shoots an over-the-shoulder or behind-the-back shot that scores a goal. Credit A1 with an assist, because in spite of there being a considerable move to score, the pass accorded A2 with an advantage that she did not previously have and because the shot was an immediate result of a pass with no essential fake to get free.

A.R. 5. Player A1 has the ball in her stick, and opponent B1 knocks the ball out of her stick. The ball goes directly into A2's stick, and she shoots and scores. Do not credit an assist, because A1 having the ball was irrelevant to A2 scoring a goal.

A.R. 6. Player A1's pass to teammate A2 is deflected and A3 catches the ball, shoots and scores. Do not credit an assist.

A.R. 7. Player A1 throws a pass to teammate A2, who is open on the goal circle. A2 shoots, and opponent B1 stops the ball but does

not catch it; A2 picks up the loose ball and scores. Do not credit A1 with an assist.

A.R. 8. Player A1 passes the ball to teammate A2, who is wide open. A2 holds the ball for more than a short period of time (10 seconds, for example). A2 then shoots and scores. There should not be an assist on the play, since the pass became irrelevant to the scoring of the goal. A statistician should carefully consider which element of the play was the more significant.

A.R. 9. Player A1 attempts a shot or pass that would not have gone into the goal. It hits teammate A2 in the shoulder and is redirected into the goal. Credit A2 with a shot and goal, and credit A1 with an assist.

A.R. 10. Player A1 attempts a shot or pass that would not have gone into the goal. It hits a defensive player's body and is redirected into the goal. Credit A1 with a shot and goal; if a teammate passed the ball to A1, normal assist rules apply.

A.R. 11. Player A1 has the ball and passes it to teammate A2 as a bounce pass, and A2 takes a shot: Credit A2 with the shot (and goal if scored); A1 is credited with an assist (if goal is scored); no ground ball is credited on the play.

A.R. 12. Player A1 passes the ball to teammate A2, who shoots. The ball touches A3 or a defensive player, but this does not materially change the direction of the ball, and it goes into the goal. Credit A1 with an assist and A2 with a shot and goal; a ground ball is not credited on the play; and A3 is not credited with any statistics. If A3 does materially affect the flight of the ball and the ball goes into the goal, credit A3 with a shot and goal and A2 with an assist.

A.R. 13. Player A1 picks up a loose ball in front of her goal circle and runs 90 yards down the field and makes a pass to teammate A2, who makes one dodge, and then shoots and scores. Credit A1 with an assist.

Note. While there must be some understandable leeway in judgment as to whether an assist should be credited on any given play, statisticians should endeavor to be consistent with both teams and during the season. It cannot be specified as to how many assists there should be in any given game, nor is it possible to extrapolate any average number per game. Some games may have very few assists and some may have many. Types of offenses may determine how many assists there will be per game as much as anything else.

► SECTION 4—SAVES

Philosophy. The basic rule of a save is that any time a ball is stopped or deflected with any part of the goalie's body or stick, which if not stopped or deflected would have resulted in the ball entering the goal, a save is recorded.

The statistician should focus on what would have happened to the ball if it had not been stopped or deflected by the goalie. If the shot would have scored, then award the goalie a save. If it would not have scored, do not credit a save. The tendency is to give a goalie a save every time she touches a shot; this creates inflated statistics. No matter how difficult it is to tell, the statistician should make consistent judgments on each shot that the goalie stopped or deflected. Consistency must be maintained so that the national statistics are meaningful.

Article 1. Offensive efforts that the goalie prevents from going into the goal are considered saves. A team save can be credited in certain situations (see approved rulings below). If the goalie is in the goal circle, no one else can be credited with a save (including a team save).

Article 2. A blocked shot by a defender is not considered a save unless the defender is in the goal circle and the goalie is not.

Article 3. A shot that hits the pipe, rebounds off the goalie's body and would go into the goal if not stopped by the goalie is credited as a save. A shot that hits the pipe, rebounds off the goalie's body and would not go into the goal before picked up by another player is credited as a ground ball.

A.R. 1. Player A1 shoots the ball from anywhere on the field, and goalie B1 stops the ball from going into the goal, but is not in the goal circle when she does so. Credit B1 with a save.

A.R. 2. Player A1 takes a shot, goalie B1 stops the ball from going in the goal but does not control the ball, and A2 picks up the loose ball and scores. Charge A1 with a shot, credit B1 with a save, and then credit A2 with a ground ball, a shot, and a goal.

A.R. 3. The goalie intercepts a pass that would not have gone into the goal while standing in the crease. Credit the goalie with a ground ball and a caused turnover.

A.R. 4. The goalie intercepts a shot that otherwise would not have gone into the goal while standing in the crease. Credit the goalie with a ground ball.

A.R. 5. The goalie makes a save, but doesn't control the ball. However, the goalie is uncontested and then picks up the ball; credit the goalie with a save, but no ground ball. If the ball would have been contested in that situation outside of the goal circle, credit the goalie with both a save and ground ball.

A.R. 6. The goalie steps out of the goal circle and there are also no defensive players in the goal circle. A shot is taken and a defensive player stops the ball; credit this as a shot that is blocked, not a save.

A.R. 7. Goalie A is not in the goal circle, but defender A1 is and she makes the save. Credit as a team save for Team A.

A.R. 8. The goalie is in the goal circle, and a defender is also in the goal circle; the non-goalie defender stops the ball. No save is credited. It is a shot that is blocked.

A.R. 9. Player A1 passes the ball to teammate A2, who does not catch the pass. The ball rolls toward the goal circle and would roll into the goal, but goalie B1 stops it. Credit B1 with a save and charge A1 with a shot.

A.R. 10. Defender B1 passes the ball to teammate B2, who does not catch the pass. The ball then rolls toward the goal circle and would roll into the goal, but goalie B1 picks it up. Credit goalie B1 with a ground ball, but not a save.

► SECTION 5—GROUND BALLS

Philosophy. A ground ball is recorded when a ball changes possession during live-ball play. A shot returned to the field of play is considered a change of possession regardless which team gains possession of the ball. A ground ball shall not be awarded if the ball (pass or shot) is sent out of bounds as the ball is dead before possession is gained. Should a player be fouled in the act of attempting to possess a ball, while said player's stick is in contact with the ball, possession is to be assumed.

When a defensive player makes an interception, please credit the player with both a ground ball and caused turnover.

Article 1. A ground ball should be credited to a player who gains possession of the ball for her team by preventing it from going out of bounds even if the play was not being contested. The philosophy is to give statistical credit for gaining possession. A ground ball would not be credited if possession is simply being maintained.

A.R. 1. Player A1 passes the ball to A2, but opponent B1 intercepts the ball. Credit B1 with a ground ball and a caused turnover.

A.R. 2. Player A1 has the ball checked out of her stick and (a.) the ball stays in bounds, where it is picked up by B1, (b.) the ball stays in bounds, where it is picked up by A2, or (c.) the ball goes out of bounds without anyone else obtaining possession. Credit a ground ball to B1 in scenario (a.) but no ground ball is credited in (b.) or (c.). Rationale: Only a change of possession would result in a ground ball. If an offensive player picks it up, there is no change of possession and thus, no ground ball.

A.R. 3. Player A1 shoots the ball, and goalie B1 makes a save but does not control the ball. Player A2 picks up the ball, shoots and scores. Credit A2 with a ground ball, a shot and a goal.

A.R. 4. Player A1 has the ball in her possession and while switching hands on her stick, drops the ball and picks it back up. No ground ball is credited on the play.

A.R. 5. The goalie makes a save, but doesn't control the ball. However, the goalie is uncontested and then picks up the ball; credit the goalie with a save, but no ground ball. If the ball would have been contested in that situation, credit the goalie with both a save and a ground ball.

A.R. 6. Player A1 chases a loose ball that is not contested and would not reach the midline or go out of bounds. A1 is not credited with a ground ball.

A.R. 7. Player A1 chases down a loose ball, preventing it from going out of bounds, and is not contested. The ball is loose after (a.) a shot by either team, (b.) a bad pass or dropped ball by an opposing

player, or (c.) a bad pass or dropped ball by A1 or a teammate. In (a.) and (b.), credit A1 with a ground ball. In (c.), there is no ground ball.

A.R. 8. Player A1 has the ball in her stick, opponent B1 checks the ball loose, and several players on the field attempt to pick it up, but it is immediately checked away before A1 has clear possession and another player picks it up. If B1 or one of her teammates picks up the ball, credit that player with a ground ball. If one of A1's teammates picks up the ball, there is no ground ball.

A.R. 9. If player A1 intentionally directs the ball to teammate A2 with her foot or part of her body or stick, and then A2 gains possession, credit a ground ball to either A1 or A2, but not both, only if the ball was previously in possession of Team B or was loose after a shot by Team A. The statistician should determine which player most impacted the gaining of possession. Justification: Only one ground ball can be credited on a play.

A.R. 10. Player A1 takes a shot that hits the side of the net, and then the goalie or defender B1 picks the ball up. No ground ball is credited on the play.

A.R. 11. Player A1 takes a shot, which goes wide of the net and is fielded by teammate A2. Credit A2 with a ground ball.

A.R. 12. Player A1 takes a shot, which goes wide of the net and is fielded by opponent B1. Credit B1 with a ground ball.

► SECTION 6—DRAW CONTROLS

Philosophy. A draw control is awarded to the player who controls the ball and/or creates an opportunity to play after the taking of a draw; i.e., gains possession after the draw.

Article 1. If a foul is called before control is established, then the player that is awarded the ball by the official is credited with a draw control. Draw controls and ground balls are mutually exclusive. A "team draw control" is credited when a draw goes out of bounds and no team gains possession. A "team draw control" will be awarded to the team that is awarded the throw-in.

Article 2. The majority of the time, the total number of draw controls in a game should be equal to the number of goals scored plus the number of periods in the game, as each period begins with a draw. The following are exceptions:

A.R. 1. A goal is scored with a very short amount of time remaining on the clock. A draw takes place but no possession is gained before the period is completed.

A.R. 2. A goal is scored in sudden-victory. Since the game ends with a final goal, there is no draw control after the goal scored in sudden-victory. A draw control does not have to be recorded.

Article 3. It should also be noted that a draw might take place, but the official halts play and restarts it with a redraw or with a throw. In both cases, the draw control is still decided at the conclusion of the redraw or throw. There is no notation necessary for the failed draw attempt(s).

A.R. 1. Players A1 and B1 take the draw. The ball flies into the air and A2 flips/bats it directly to A3. Credit A2 with a draw control as she controlled the ball and created the opportunity.

A.R. 2. Players A1 and B1 take the draw. The ball flies straight up into the air and is caught by A1. Credit A1 with a draw control.

A.R. 3. Players A1 and B1 take the draw. The ball flies into the field of play and is loose on the ground. B2 recovers the ball in the field of play. Credit B2 with a draw control.

A.R. 4. Players A1 and B1 take the draw. The ball flies into the field of play, but a foul is called before anyone gains possession. B2 is awarded the ball after the foul. Credit B2 with a draw control.

A.R. 5. Players A1 and B1 take the draw. The ball flies into the air or onto the field of play, but play is halted and a redraw or throw is called by the official. After the redraw or throw, player A2 gains possession of the ball or is awarded possession after a foul call. Credit A2 with a draw control.

A.R. 6. Players A1 and B1 take the draw. The ball flies into the field of play, but goes out of bounds before anyone can gain possession. Team A is awarded the ball. Credit Team A with a "team draw control."

► SECTION 7—SHOTS

Article 1. A ball propelled toward the goal by an offensive player with her stick shall be called a shot. The ball may be thrown from the stick or deflected by her stick. The statistician should take care to award shots only when possession of the ball can reasonably be said to have occurred or when a controlled effort to deflect the ball can be construed (somewhat similar to controlled tips in basketball).

Article 2. A ball that enters the goal propelled by the offensive team must then become a shot and a goal.

Article 3. A ball that ricochets off another offensive player's stick and scores will be awarded as a shot by the player deemed to have scored the goal.

Article 4. In the case of a Team Goal (also known as an Own Goal), there is no shot recorded. See Section 2 – Goals for more information.

Article 5. A player who takes an eight-meter (free-position) shot should be charged with an eight-meter (free-position) shot. An eight-meter (free-position) shot also counts toward a player's total number of shots in the game. It is important to note that a player who is awarded an eight-meter (free-position) attempt but does not shoot the ball is not charged with an eight-meter (free-position) shot.

NOTE: One of the most common misdefinitions in lacrosse is that of "shot on goal." A shot on goal is not the same thing as a shot at the goal. The latter encompasses all shots; the former encompasses only shots scoring and those having been saved by the goalie. A shot that hits the pipe is not a shot on goal.

A.R. 1. Offensive player A1 passes the ball to teammate A2, who does not catch the pass. The ball rolls toward the goal circle and would roll into the goal, but goalie B1 stops it. Credit B1 with a save and charge A1 with a shot.

A.R. 2. A1 takes a shot that is ruled dangerous or is otherwise nullified by a foul call. A shot is not charged, nor a save credited for goalie B1 (if saved), nor a goal awarded (if scored). Shots, saves and goals should only be credited on plays in which the goal would be counted by the officials if the ball went into the net.

A.R. 3. A1 takes an eight-meter (free-position) shot that is saved by goalie B1. Charge A1 with an eight-meter (free-position) shot, which also counts toward A1's total number of shots in the game, and credit goalie B1 with a save.

A.R. 4. A1 is awarded an eight-meter (free-position) attempt, but does not attempt a shot. A1 is NOT charged with an eight-meter (free-position) shot.

► SECTION 8—CLEARING

Philosophy. A clearing attempt is defined as when a team has possession of the ball behind its defensive restraining line to the offensive attack area (see Appendix B for a field diagram). A successful clearing attempt involves the team establishing possession in its offensive box before the other team gains possession.

Article 1. Team A is a player down and begins to clear the ball out of its defensive end. The carded player's time expires and she re-enters the game, so Team A is back to even. If the clearing attempt is unsuccessful but the carded player has re-entered the field of play, it is in the statistician's discretion. Charge an unsuccessful clear to Team A if the player returns into the flow of play. Do not charge one if the returning player was not able to return to flow of play. The return of the carded player does not automatically indicate that a clear attempt has occurred. The returning player has to be involved in the flow of play (see Appendix B for a field diagram).

Article 2. A team playing a player down as a result of a card should be credited with a successful clear if it meets the conditions of successful clear, but should not be credited with an unsuccessful clear if it does not.

Article 3. All failed clears must have a team or individual turnover charged.

A.R. 1. Team A is a player down and begins to clear the ball out of its defensive end. The penalty time expires, so Team A is back to even. If the clearing attempt is unsuccessful but the penalty has been released, it is in the statistician's discretion. Charge an unsuccessful clear to Team A if the player returns into the flow of play. Do not charge one if the returning player was not able to return to flow of play. The release of the penalty does not automatically indicate

that a clear attempt has occurred. The released player has to be involved in the flow of play.

A.R. 2. Team A has the ball on a clearing attempt and loses control of the ball, but Team B does not establish possession of the ball, and Team A regains possession. This is considered the same clearing attempt for Team A whether it regains control by picking up the ball or having the ball deflected out of bounds off of Team B.

A.R. 3. Team A has begun a clearing attempt, and before a successful or unsuccessful clear, Team A calls for and is awarded a timeout. The original clearing attempt is still on when play resumes.

A.R. 4. Team A has the ball on a clearing attempt. There is a held whistle on Team B. Team A loses the ball before it reaches the offensive zone, but the foul is assessed to Team B. Team A's clearing attempt is still underway when play resumes and normal clearing rules apply.

A.R. 5. If Team A takes possession of the ball in its defensive end and immediately loses the ball to Team B, charge Team A with an unsuccessful clear.

A.R. 6. Team A has the ball on a clearing attempt and commits a violation or penalty. That is a failure to clear because Team A did not establish possession in its attack area.

A.R. 7. Team A is in a clearing attempt when a throw situation applies before the status of the clear is determined. Charge Team A with an unsuccessful clear if it is not the team that gained possession. Normal clearing rules will continue to apply if Team A is the team awarded possession.

A.R. 8. Team A has possession of the ball in the offensive end of the field and passes a ball that goes past midfield and below the restraining line. However, Team A regains the ball before Team B gains possession. This becomes a clearing attempt.

A.R. 9. A free clear is awarded to the defensive team (i.e., goalie interfered with while in the crease, card). It is considered a clearing attempt and usual clearing rules apply once play is resumed.

A.R. 10. During a multiple-card situation, if both teams are playing with equal numbers, the usual clearing rules apply.

A.R. 11. A free clear is awarded to the defensive team (i.e., goalie interfered with while in the goal circle). It is considered a clearing attempt and usual clearing rules apply once play is resumed.

► SECTION 9—TURNOVERS AND CAUSED TURNOVERS

Article 1. Turnovers occur when a player or team in possession of the ball or entitled to the possession of the ball loses possession of the ball, in a live-ball situation or under certain dead-ball situations. If a single player is judged to be primarily responsible for the turnover, that player is charged with the turnover. If no single player can be judged to be primarily responsible for the turnover, or if the responsibility rests with anyone not a player, then the team is charged with the turnover.

Note: The word "player" refers to one of 12 or fewer members of a team's personnel who are on the playing field.

Article 2. A caused turnover is credited to a player when the player's positive, aggressive action(s) causes a turnover by the opponent. A turnover may not always warrant a caused turnover; however, caused turnovers can only be awarded to an individual player, and only one caused turnover can be awarded for a turnover. There cannot be more caused turnovers for Team A than turnovers for Team B. Any turnover credited as a team turnover cannot have a corresponding caused turnover.

Article 3. For a change of possession that occurs that cannot be attributed to a particular player at the moment of the violation, the turnover should be charged as a team turnover.

Article 4. A missed shot cannot be a turnover.

Article 5. All failed clears are by definition also turnovers.

A.R. 1. Player A1 has possession of the ball and opponent B1 checks the ball away from A1, resulting in a change of possession. Charge a turnover to A1 and credit a caused turnover to B1.

A.R. 2. Player A1 is in possession of the ball. She is fouled by opponent B1 and loses possession. Teammate B2 gains possession and the whistle blows because of the foul. Do not charge a turnover or credit a caused turnover on the play.

A.R. 3. Player A1 has the ball, loses it, and opponent B1 fouls trying to gain possession of the ball. Do not charge A1 with a turnover

or credit B1 with a caused turnover, since B1's team did not have the ball nor was entitled to the ball.

A.R. 4. Player A1 has the ball, loses possession, and fouls opponent B1, who is going for the ball. Charge A1 with a turnover since her action resulted in B1's team gaining the ball. Normal caused turnover rules can apply in this situation.

A.R. 5. Team A is in possession of the ball when the officials call "for a throw" in the field of play. If Team A maintains possession of the ball, no turnover is charged. If Team B gains the ball, normal turnover rules apply (individual, team and caused turnover).

A.R. 6. Player A1 has the ball, and a card or violation is called on a teammate in the game, or a card is assessed on a member of her team, coach, or staff, on the sidelines. Charge the turnover to the player causing the foul or to the team if a coach or staff member is assessed the card. Another example: Player A1 has the ball, and teammate A2 is called for an illegal screen or interference. Charge the turnover to A2 (the one committing the violation).

A.R. 7. Player A1 is in possession of the ball at the end of a dead-ball situation, and (a.) an action of hers, or (b.) an action of someone else connected with her team, causes Team A to lose possession of the ball. Charge A1 with a turnover in (a.), or in (b.) to another player, or a team turnover to Team A, if the cause is the action of a coach or staff member (e.g., delay of game).

A.R. 8. Player A1 is in possession of the ball and passes to teammate A2, who does not catch the pass and a change of possession occurs. Charge the turnover to either A1 or A2, whichever player the statistician thinks contributed to the turnover the most. Award a caused turnover to the defensive player who was most responsible for the turnover regardless of that player's position on the field at the time of the turnover; or no caused turnover if, in the scorer's discretion, it was an unforced error.

A.R. 9. Team A is in possession of the ball, but player A1 crosses the restraining line and causes Team A to be offsides. Charge the turnover to A1, with no caused turnover credited on the play.

A.R. 10. Team A is attempting to clear and is unsuccessful. A turnover must be charged to Team A against either the team or an individual, but not both.

A.R. 11. Player A1 is assessed a charging foul on offense against defender B1. Charge A1 with a turnover and credit B1 with a caused turnover.

► SECTION 10—MISCELLANEOUS NOTES AND DEFINITIONS

Article 1. Any statistics that occur due to a violation or play-on situation whose result would be nullified by the violation or play-on do not count.

A.R. 1. Player A1 loses the ball out of bounds after it is checked out her stick by Player B1, but Team A is awarded the ball due to a held whistle or a foul called on Team B." Do not credit A1 with a turnover nor B1 with a caused turnover because Team A maintained possession of the ball.

A.R. 2. Player A1 takes a shot during a play-on situation that would have counted as a goal had it been successful but (a) goes wide of the cage and out of bounds, (b) is saved by goalie B1, or (c) goes wide of the cage and is picked up by player B2. Team A is then awarded possession due to the held whistle. In all cases, credit A1 with a shot. In (b) credit goalie B1 with a save because she prevented a shot from scoring which otherwise would have counted as a goal. In (c) do NOT credit B2 with a ground ball, because Team A is awarded possession.

Goalkeeper of Record: At the conclusion of each game, the scorer shall award one goalie a win and charge one goalie a loss. In the event that the teams use multiple goalies during the course of the game, it is up to the scorer's discretion to award and charge the decision based on which goalie (in the scorer's opinion) contributed most to the outcome of the game.

► APPENDIX A—NCAA STATISTICS POLICY NOTES

Changing Official Statistics: When an error or discrepancy in the official statistics is discovered after a contest has concluded and the official statistics have been distributed, use the following procedure.

If the sports information director of the home team discovers the error, that SID must alert the visiting team SID of the change within one week. The home SID also must confirm the changes with the visiting SID

in writing within 10 days. If applicable, the home SID also must send a copy of the changes to the conference office.

If the visiting SID needs to make a change in the final statistics, he or she must contact the home team's SID within one week after the event. If the home team SID agrees, then the home team SID must confirm the changes to the visiting SID in writing and send a copy to the conference office, if applicable.

If the home team SID disagrees with the change, then the visiting SID must accept the final statistics as listed by the home team. The visiting team SID cannot alter any statistics without the consent of the home team SID. There is no further appeal. However, if the game was televised and/or videotaped, and the dispute involves a non-judgmental call, the box score should be corrected if there is indisputable visual evidence. Example: An official scorer in basketball credited the wrong player with a free throw made and the videotape clearly shows a different player shooting, then the correct player should be credited with the free throw made and attempted. If the dispute is whether there was an assist on a certain play, this is a judgment call and the official box score should stand as is. Another example: In soccer, a player was given credit for a goal scored but videotape shows clear visual evidence that another player actually scored the goal, then the official box score should be changed to reflect the correction.

In all cases in all sports, if a change is to be made, the SID making the change must inform the other SID within one week after the event or game has been played.

Countable Opponents: Only games against varsity teams of four-year (or two-year senior colleges), degree-granting institutions (that play a majority of their contests against U.S. college varsity teams) shall be included in individual and team statistics, won-lost records and coaching records. This can include non-U.S. schools such as NAIA members British Columbia or Columbia Bible.

Forfeit Scores: If a forfeit is declared by the game official while a contest is in progress or a situation occurs that forces a premature end to the contest, all statistics (other than won-lost and coaches' records) are voided unless the contest has progressed to a "reasonable point of conclusion" (see the chart on the next page), in which case all statistics shall count and shall be reflected in all records. If the game had progressed to a "reasonable point of conclusion" and the team that was in the lead at the time was declared the forfeit winner, the score shall stand. If the score was tied or the trailing team was declared the forfeit winner, then refer to the chart on the next page for the final recorded score. Also in these cases, in sports in which individuals receive wins or losses such as baseball, softball, field hockey, ice hockey and lacrosse, do not credit an individual with a win or loss, but rather enter a team line for these statistics.

If a game in progress is declared a forfeit win to one of the teams by the game officials and the game has not progressed to a "reasonable point of conclusion," then the official game score should be recorded from the following chart. The team's won-lost record shall include the forfeit, but if the statistics are voided, all averages in future rankings shall be computed without inclusion of the forfeited contest.

Forfeit score: Lacrosse, 1-0

Reasonable point of conclusion: Women's Lacrosse, 48 minutes elapsed

"No Contest" Declaration: There is no forfeit of a contest until all participating teams are present and the referee or other appropriate contest official has assumed jurisdiction in accordance with the applicable playing rules. When a team does not appear (e.g., due to weather conditions, accidents, breakdown of vehicles, illness or catastrophic causes), a forfeit is not recorded. An institution shall not, for statistical purposes, declare a forfeit for nonfulfillment of a contest. Such instances shall be considered as "no contest." In circumstances involving institutions from the same conference, the league office has the option to declare a forfeit win and loss for conference-standings purposes only but this does not change an institution's overall won-lost record. This "no contest" declaration came into effect at the start of the 1977 football season.
