

Chatfield Charger Legacy Member

The Chatfield Charger Baseball program has a vision for its future. The Legacy Members will help us achieve it. We need to complete certain necessary field improvements to have a field that is safe, ready to help us compete at the top level & be the pride of the county. The Diamond Club and the Charger Coaching staff have determined specific needs to enable these goals to happen.

The \$2,000 annual commitment for four years has benefits matching those of a Home Run Sponsor plus a permanent memento at the Concession Stand.

INFIELD IMPROVEMENTS

Wind gradually blows the top layer of dirt away on an annual basis and we use a 65/35 red clay mix. Additionally, after every game and many practices, the pitcher's mound and home plate area must be repaired with Pro Mound Clay.

OUTFIELD IMPROVEMENTS

Outside of the general care and watering of the outfield, there is an obvious and immediate need to strip, re-level and resurface the entire outfield. The outfield over time has taken the brunt of the weather damage and usage by outside entities. It has been trampled severely and there are pot holes, dangerous divots and many uneven spots throughout the entire grass area.

DUGOUT IMPROVEMENTS

The Dugout floor needs replaced so the players aren't damaging their cleats and have an absorbent composite to prevent knee and joint pressure as they take their place in the dugout.

FENCE REPAIRS

In some parts of the outfield, the fence has become loose and or slanted. We need to secure it, not just for cosmetic purposes, but for gameplay and most importantly, safety reasons. The center field portion is the worst. The dirt warning track and surrounding the fence blows away over time due to the wind and it needs to be replaced.

MISCENLLANEOUS ISSUES

With Colorado weather and the fact that baseball season now lasts from February to October, different field and maintenance issues constantly arise.
